(iPad mini, iPhone 5, iPod Touch)

s12  
**sDock Pro**

for iPad Pro 12.9"

# Features

## Lockable.

The plug-in lock securely locks the sDock.  
The iPad cannot be removed without a key.

## Pivotable.

sDock can be rotated  
by 90 degrees.

## Chargeable.

An Apple 30 pin or a lightning connector and three USB micro connectors are integrated into the lower fastening latch. You can charge all the latest iPads, iPhones, or iPods, in the sDock.

## Wall mount.

Unlike most other mounts with sDock there are no unsightly fasteners, magnets, or frames that are seen when the iPad is removed from the sDock. What is seen is the picture frame.

## Picture Frame.

Without an iPad inserted into the sDock, the sDock turns into a stylish clip-on photoframe made from anodized aluminium, that you can use to display your favourite pictures, information or advertising.

## An iPad is an iPad...

The design of the iPad remains pristine.  
An Apple Smart Cover is the perfect match for the sDock.

## Easy Handling.

The iPad is securely inserted into the sDock with a flick of the wrist. Latch it and immediately start charging it.

## Cable management. Power supply.

(a) on the wall surface: from the external USB connector to the nearest socket with our extra long 1.5m USB cable.

(b) flush with the wall surface and no visible cables anymore : the sDock can have its power supply at the back - and thus remains pivotable! You can use either the Apple power supply or our sCharge (c) inwall charger.

onwall cable

Apple power supply

sCharge

sCharge Inwall power supply  
for standard EU inwall boxes
